Protecting the environment and promoting worker health and safety are issues at the center stage of today's property industry. This course provides you with an overview of the environmental health and safety considerations in building operations. You'll learn to develop and manage proactive environmental/occupational health and safety programs, comply with regulatory standards and guidelines governing facility health and safety issues, and assess when to obtain technical assistance.

**Major topics covered in this course:**

- Regulatory Overview
- OSHA and EPA Relations
- Hazard Communication
- Emergency Response
- Site assessments
- Audits, record keeping, and legal issues
- Air emissions and pollution controls
- And much more.....

**You will take away these key concepts and skills:**

- An awareness/understanding of the industry/
- Government regulations that relate to your facilities and how to comply
- An overview of legal implications and the importance of accurate record keeping
- A list of resources and an extensive glossary for further information on the topics covered
