commercial maintenance consultants • all flooring, rugs, upholstery & fabric

**Center for Disease Control (CDC):** Cleaning and disinfecting public spaces including your workplace, school, home, and business will require you to:

- Develop your plan
- Implement your plan
- Maintain and revise your plan

Reducing the risk of exposure to COVID-19 by cleaning and disinfection is an important part of reopening public spaces that will require careful planning.

We've been creating customized recurring flooring & upholstery "deep cleaning" programs for 33 years throughout the San Francisco Bay Area. This makes us uniquely qualified in providing you a clean and healthy workplace: peace of mind = freedom from worry and anxiety.

*\*\*\*Excerpts from the Restoration Industry Association (RIA) & Institute of Inspection Cleaning and Restoration Certification (IICRC – of which we are a member):*

“With the recent announcement by the CDC that the virus can likely be transmitted through contact with **contaminated clothes, linens, and shoes, the washing of soft goods now has increased importance.**”

“**Applying appropriate anti-microbial solutions as an aerosol is an effective way to reduce micro-organisms on walls, floors, and horizontal surfaces.**”

We are vetted by following Center for Disease Control guidelines for our operations.  
We feel fortunate to have a role in providing a solution and we're here to help.
